

BESPOKE PRODUCTS

Formed in 1993, Concept Conversions Ltd is the leading independent converter and fabricator of insulation material in the UK.

Our sales office staff have, collectively, over 40 years experience of working in the insulation industry and are on hand to offer design advice, competitive prices and rapid availability.

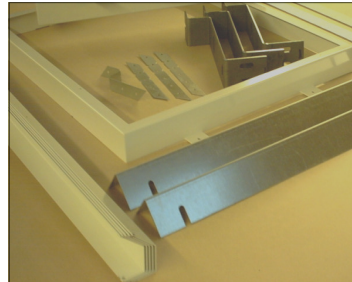

Our production facility has fabrication capabilities to produce to most specifications.

We offer full trace-ability on all of our products (whether they are made to order or from our standard range) and a high level of quality control.

Our production staff have a wealth of experience in working with most types of insulation materials and many of the more uncommon facing materials such as Lantor, Melinex and Sonic Cloth.

Whether it is acoustic baffles or high temperature machine room linings that are required, our staff are fully trained and experienced to produce the right solution.

To compliment our insulation products and services we have developed a full package of bespoke metal fabrication works that include CNC folding and punching, forming, laser cutting, welding, painting and chemical etching.

We have a fleet of vehicles providing a national delivery service that is second to none. We aim to deliver all of our orders within two days of manufacture and can offer timed deliveries, scheduled call offs and overnight palletised freight if required.

At Concept Conversions Ltd we strive to be the most flexible insulation solution provider in our industry. We are fully committed to getting the right product to the right place at the right time.

To experience our professional bespoke insulation products service, pick up the phone and let us do the rest!
